PRICE LIST OF CHOICE NORTHERN GROWN GLADIOLUS BULBS

PLEASE READ BEFORE ORDERING

TERMS AND CONDITIONS:— Cash with all orders. Stock offered subject to prior sale. Prices cover bulbs that are one inch or more in diameter, and guaranteed to be healthy and true to name. We will replace any found otherwise or refund the purchase price if claim is made during the present calendar year. We never substitute without permission; but, if you will advise when writing your order, whether you wish substitution or not, it may save correspondence and delay. If you prefer some substitution to a partially filled order, we will try to please you; however, the sooner you send your order after receiving this price list, the more likely you will be to get just what you want, before stocks are depleted.

Where prices are quoted by the dozen, single bulbs will be supplied at one-tenth the dozen rate, except that no single item may be less than 15 cents. Six bulbs at one-half the dozen rates. At these prices, we prepay shipments to points in United States and Canada when order amounts to \$2.50 or more. On page 4, a few varieties are offered by the hundred. At those prices, purchaser pays transportation charges. If it is desired to combine in one order, varieties priced by the dozen with some priced by the hundred, add 15% to the hundred prices and we will prepay the entire lot.

THE BULBS WE SELL:— We use great care to produce bulbs that are true to name, free from disease and first class in every particular. Growing instructions are enclosed with each order shipped. If these instructions are followed, every bulb we send out will produce a good spike of bloom. We do not sell planting stock or bulblets. Orders are filled, mainly, with first size bulbs as long as available, unless smaller sized are requested. Later in the season, it will be necessary to use more of the second and third sizes. Some experienced growers prefer No. 3 to larger sizes for out-door planting.

Orders are acknowledged same day as received. Shipping begins as soon after March 15th as weather seems safe; and thereafter orders are filled in rotation. Planting begins about April 15th; and ends around June 1st. Soon after planting begins, some varieties will not be available, so early orders are to your advantage and ours.

Prices in this list are cancelled at close of present shipping season. Please do not use this list to order for next year's delivery; but wait until you receive our new price list. If you have ordered bulbs during the last three years, you will receive a copy as soon as issued. We are very glad indeed to mail a list to any one requesting same; and we will appreciate the names of your friends interested in Glads.

Address all communications:
